Q14 — Road Type Comparison | Fatal or Serious Collision Rates — 2025

Road Type	Overall FS Rate (%)	Daytime 10–15 FS Rate (%)
Dual carriageway	21.39	19.73
Single carriageway	19.50	19.61

Key Findings

- Overall, dual carriageways recorded a higher fatal-or-serious collision rate (21.39%) than single carriageways (19.50%).
- During daytime hours (10:00–15:59), the rates were much closer: 19.73% for dual carriageways and 19.61% for single carriageways.
- These results describe the analysed collision records and do not account for traffic volume or distance travelled.

Note: The comparison values are a static summary of the Q14 analysis and do not respond to report filters.
